#### EMERGING TRENDS IN MECHANICAL ENGINEERING

Course Code: 315363

Programme Name/s : Automobile Engineering./ Mechanical Engineering/ Mechatronics/ Production

Engineering/

Programme Code : AE/ ME/ MK/ PG

Semester : Fifth

Course Title : EMERGING TRENDS IN MECHANICAL ENGINEERING

Course Code : 315363

#### I. RATIONALE

As new technologies rapidly transform the manufacturing industry and related sectors, this course on Emerging Trends in Mechanical Engineering is designed to equip diploma pass outs with the latest knowledge essential for their professional growth. The course covers key areas such as green fuels, autonomous and sustainable maintenance practices, data analytics in manufacturing, and the integration of autonomous vehicles. It also explores the use of drones and autonomous technologies in agriculture. By focusing on these current trends, the course aims to enhance the skills of Mechanical, Automobile, Production, and Mechatronics diploma engineers, preparing them to excel in a rapidly evolving technological environment.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

Adopt recent trends in mechanical engineering across various mechanical and allied industries.

## III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Select appropriate green fuels for various applications for considering environmental sustainability.
- CO2 Apply the principles of Autonomous and Sustainable maintenance practices in industry to improve equipment reliability and efficiency.
- CO3 Identify the levels of autonomy in various mobility systems.
- CO4 Use data analytics techniques to improve manufacturing processes and systems.
- CO5 Utilize automated equipment and technologies for various agricultural applications.

## V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's)aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.					
1	TLO 1.1 Explain the concept of green fuels, including their benefits and advantages. TLO 1.2 Differentiate between the various classes of green fuels based on their sources and production methods. TLO 1.3 Describe different types of green fuels derived from plants.	Unit - I Green Fuels  1.1 Green Fuels: Introduction, Characteristics, Benefits and advantages.  1.2 Classes of Green Fuels: 1st Generation, 2nd Generation, 3rd Generation and 4th Generation Green Fuels  1.3 Types and Applications of Green Fuels: Biofuel, Hydrogen fuel, Synthetic fuel, Algae fuel, Bio diesel from plants, Applications of Green Fuels in Automobile, Power and Heat, Aerospace sectors.	Lecture Using Chalk-Board Presentations Video Demonstrations					
2	TLO 2.1 Explain the concepts of data analytics, including its types and techniques. TLO 2.2 Describe the role of a data analyst in the manufacturing industry. TLO 2.3 Explain the characteristics of big data and its applications in manufacturing processes.	Unit - II Recent trends in Manufacturing systems 2.1 Big Data in Manufacturing: Introduction, Big Data Characteristics, Benefits 2.2 Data Analytics in manufacturing: Introduction, Steps in Data Analytics, Types of Data Analytics, Data Analytics techniques, Applications of Big Data analytics in Manufacturing – Preventive maintenance, Product Design, Production Management Automation, Customer Experience, Supply Chain Improvement, Benefits. 2.3 Data Analytics in Quality Control: Introduction, Applications, Benefits.	Lecture Using Chalk-Board Video Demonstrations Presentations					
3	TLO 3.1 Explain the levels of autonomy in mobility systems. TLO 3.2 Describe the systems used in autonomous vehicles such as Advanced Driver Assistance Systems (ADAS) and Full Self-Driving (FSD) technologies. TLO 3.3 State the application of Autonomous Vehicles for given mobility system.	Unit - III Autonomous Vehicles 3.1 Autonomy in Mobility Systems (Autonomous Vehicle): Levels, Components, Benefits and Challenges. 3.2 Systems used in Autonomous Vehicles: Advanced Driver Assistance Systems (ADAS) and Full Self-Driving (FSD) 3.3 Applications of Autonomy in other Mobility Systems: Autonomous Trains, Autonomous Ships, Autonomous Aircrafts (Unmanned Aircraft Systems (UAS)	Lecture Using Chalk-Board Presentations Video Demonstrations					
4	TLO 4.1 Describe the concept of Autonomous and Sustainable	Unit - IV Recent Trends in Maintenance 4.1 Autonomous Maintenance: Concept, Pillars of	Lecture Using Chalk-Board

#### **POWER ENGINEERING**

Course Code: 315371

: Mechanical Engineering **Programme Name/s** 

**Programme Code** : ME Semester : Fifth

**Course Title** : POWER ENGINEERING

**Course Code** : 315371

#### I. RATIONALE

The diploma holders in Mechanical Engineering are mainly responsible for supervising, testing, and maintenance of power engineering devices. The knowledge of power engineering is useful in selecting a suitable prime mover for a given application along with maintaining and testing of these devices. Therefore, the knowledge and skills covering the basic principles of power engineering devices are necessary for mechanical diploma engineers. In view of the requirements, this course is designed to establish basic fundamental and practical knowledge in the fields of I.C. engines, air compressors, refrigeration & air conditioning, and energy-saving opportunities in air compressor and refrigeration & air conditioning systems.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

Maintain power engineering and refrigeration devices for various industrial / field applications using relevant knowledge & skills related to power engineering.

## III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Assess the performance of given refrigeration systems.
- CO2 Measure the cooling capacity of air-conditioning systems.
- CO3 Carryout test for the performance of an I.C. engine.
- CO4 Analyze the performance of air compressor.
- CO5 Use the knowledge of energy saving in air compressor & refrigeration and air-conditioning systems.

# V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's)aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Draw Carnot and Bell Coleman cycle on P-V & T-S diagram. TLO 1.2 Calculate the COP of the given vapor compression cycle. TLO 1.3 Illustrate the working of the vapor absorption refrigeration system. TLO 1.4 Select relevant refrigerant for a given application with justification TLO 1.5 Explain with a neat sketch working of a domestic refrigerator, water cooler, ice plant & cold storage. TLO 1.6 Compare traditional methods of cooling with the recent cooling process.	Unit - I Refrigeration  1.1 Definition of refrigeration, refrigeration effect, unit of refrigeration, coefficient of performance, air refrigeration, reverse Carnot cycle, Bell – Coleman cycle & its representation on P-V & T-S diagram.  1.2 Vapor Compression Refrigeration Systems (VCRS): Basic components, flow diagram of the vapor compression cycle, working of VCRS, representation of the vapor compression cycle on P-H & T-S diagram, sub cooling and superheating, expression for refrigerating effect, work done and power required, coefficient of performance COP. (Simple numerical on VCRS)  1.3 Vapor Absorption Refrigeration System (VARS): Principle of vapor absorption refrigeration system, basic components, construction and working of simple vapor absorption refrigeration system, comparison of VCRS and VARS. (No numerical on VARS)  1.4 Refrigerants: Definition, desirable properties of refrigerant, primary and secondary refrigerant, selection of refrigerant, concept of Global Warming Potential (GWP), Ozone Depletion Potential (ODP).  1.5 Applications: Specification, construction and working of refrigerator, water cooler, ice plant, and cold storage.  1.6 Traditional methods of cooling used in ancient India (IKS). (No question to be asked)	Lecture Using Chalk-Board Presentations Model Demonstration Video Demonstrations
2	TLO 2.1 Classify air conditioning systems. TLO 2.2 Determine properties of air using a psychrometric chart for given application. TLO 2.3 Represent psychrometric processes on psychrometric chart. TLO 2.4 Explain with a neat sketch working of 2/4-way ceiling mounted cassette air conditioner.	Unit - II Air Conditioning  2.1 Air conditioning: Definition, factors affecting comfort air conditioning, classification of air conditioning systems, comfort air conditioning and industrial air conditioning.  2.2 Psychrometry: Definition of dry air, moist air, saturated air, dry bulb temperature, wet bulb temperature, dew point temperature, absolute humidity, relative humidity, specific humidity, enthalpy of moist air. Psychrometric chart, use of psychrometric chart.  2.3 Psychrometric Processes: Sensible heating, sensible cooling, humification, dehumidification, heating and humidification, cooling and humidification, cooling and dehumidification. Representation	Lecture Using Chalk-Board Presentations Model Demonstration Video Demonstrations

		of the above process on a psychrometric chart. Sling psychrometer. (Simple numerical using psychrometric charts and tables)  2.4 Applications: Construction and working of window air conditioner, split air conditioner, 2/4-way ceiling mounted cassette air conditioner.	11.				
3	TLO 3.1 Calculate the performance parameters of the given I.C. engine. TLO 3.2 Explain the procedure to calculate the indicated power of the given engine using the morse test. TLO 3.3 Explain with neat sketch working of catalytic converter to control the emissions from the I.C engine. TLO 3.4 Illustrate the diagnostic procedure of the Engine Control Unit with flow diagram.	Unit - III I.C Engine Testing and Pollution Control 3.1 Purpose of I.C. engine testing, I.C. engine testing norms. Definition & measurement of performance parameters like brake power, indicated power, frictional power, brake and indicated mean effective pressures, brake specific fuel consumption, brake thermal efficiency, indicated thermal efficiency, mechanical efficiency, and relative efficiency. Morse test, heat Balance sheet, (Simple numerical on the performance of I.C. engines, morse test & heat balance sheet) 3.2 Polluting emissions in S.I. & C.I engines and their effects on the environment. Controlling methods: Catalytic converters, Exhaust Gas Recirculation (EGR). Standard pollution norms like EURO IV & VI, BS-VI. Engine Control Unit (ECU): Working and Diagnostic procedure.	Lecture Using Chalk-Board Presentations Video Demonstrations				
4	TLO 4.1 Classify air compressors. TLO 4.2 Explain the construction and working of single-stage & two-stage reciprocating air compressors. TLO 4.3 Calculate the performance parameters of the given compressor. TLO 4.4 Select relevant air compressor for the given application with justification.	Unit - IV Air Compressors  4.1 Function of air compressor, uses of compressed air, classification of air compressors. Construction and working of single-stage and two-stage reciprocating air compressors, screw compressor, centrifugal compressor, axial flow compressor. Comparison of rotary compressor with reciprocating air compressor.  4.2 Necessity of multi-staging, advantages of multi-staging, intercooling, representation of processes involved on P-V diagram, calculation of work done.  4.3 Specifications of air compressors, pressure ratio, compressor capacity, free air delivered, volumetric efficiency, isothermal efficiency. (Simple numerical on reciprocating air compressor)	Lecture Using Chalk-Board Presentations Video Demonstrations				
5	TLO 5.1 List the different components of a compressed air system. TLO 5.2 Elaborate the energy saving opportunities in compressed air systems. TLO 5.3 List the factors affecting the performance and energy	Unit - V Energy Efficiency in Air Compressor & Refrigeration and Air Conditioning 5.1 Air Compressor: Compressed air system components, need of energy management in compressed air systems, factors affecting efficient operation of compressed air systems, checklist for energy efficiency in compressed air systems. 5.2 Refrigeration & Air conditioning: Factors affecting performance and energy efficiency of refrigeration and air conditioning system, energy saving opportunities in	Lecture Using Chalk-Board Presentations Video Demonstrations Site/Industry Visit

POWER ENGINEERING Course Code: 315371								
Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles		Relevant COs				
Judicial mix of LLOs are to be performed to ac	hiev	e desired outcomes.						

# VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

# **Assignment**

- Prepare a power point presentation on Bharat Stage & Euro emission norms for I.C. Engine.
- Make charts for performance characteristics of I.C. engine.
- Make a chart showing the heat balance sheet format to display in a laboratory.
- Collect specifications of domestic refrigerators of various air conditioners from manufacturers websites.
- Collect information on different tests used for I.C. engines.
- Prepare troubleshooting chart for domestic refrigerator/window air conditioner.
- Make a chart showing valve timing diagrams of four stroke petrol and diesel engines.
- Prepare maintenance schedule of air compressor.
- Collect information about fuel injection systems used in S.I & C.I engine.

#### Micro project

- Select the old parts of any rotary air compressor and mount it on a wooden board with the label and display it in laboratory.
- Collect constructional and working details of different types of reciprocating and rotary compressors.
- Collect major specifications & constructional details of different types of refrigeration and air conditioning units.
- Prepare and present a seminar on energy saving opportunities in compressed air systems using any suitable source of information.
- Prepare and present a seminar on energy saving opportunities in refrigeration and air conditioning systems using any suitable source of information.
- Collect information and pictures about ancient cooling methods from suitable sources of information.
- Display various components of Multi Point Fuel Injection (MPFI) system on wooden board with labels.
- Specifications &types of various components like compressor, condenser, air handling unit, chillers, etc.

### Note:

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicial mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

POWER ENGINEERING	Course Code :
-------------------	---------------

		LLO Number
1	Actual working or scrap unit of a domestic refrigerator of a minimum 165 liters having all necessary parts.	1
2	Test rig of multi-cylinder I.C. Engine with 3/5/7 HP Petrol/Diesel Engine with the necessary arrangement to conduct morse test.	12
3	Exhaust gas analyzer 3/5 gas analyzer - For CO (%)-Range 0-10, For HC (ppm)- Range 0-10000, PM-Range 0-9000.	13,14
4	Engine Control Unit (ECU),OBD II car diagnostic tool Grade II	15
5	Test rig of two-stage reciprocating air compressor with minimum ½ HP motor with necessary pressure and temperature gauges at a suitable location.	16,17,18
6	Available air conditioning system in your institute.	19
7	Vapor compression refrigeration test rig with hermitically sealed compressor ½ to ¼ HP motor, air-cooled condenser, expansion devices like TEV or capillary tube, pressure and temperature gauges at suitable locations.	2
8	Actual working or scrap unit of water cooler of minimum 200 liter capacity having all necessary parts.	3
9	Standard sling psychrometer to measure DBT and WBT.	4
10	Old cut section of window air conditioner, tool Box containing flaring tool, spanner, piercing pliers, hammer, side cutter, cordless screw driver, rounding tool etc.	5
11	Window air conditioner test rig with 1 to 2 TR cooling capacity with forced convection condenser and evaporator fitted with all necessary instrumentation.	6
12	Split air conditioner model with 1 to 2 TR capacity, Expansion Device Capillary Tube compatible capacity, Temperature Sensors RTD PT-100 Type, Air cooled condenser compatible to 1 Ton compressor	7
13	Air conditioning test rig with hermitically sealed compressor ½ to ¼ HP motor, air-cooled condenser, expansion devices like TEV or capillary tube, pressure and temperature gauges at suitable locations, blower unit with 1HP,3 phase motor, steam generator to generate steam with suitable piping for introducing steam in the duct- 8-liter capacity with 2 kw heater.	8
14	Test rig of single cylinder/multi cylinder I.C. Engine with 3/5/7 HP Petrol/Diesel Engine with necessary arrangement	9,10,11

#### **AUTOMOBILE ENGINEERING**

Course Code: 315372

**Programme Name/s**: Mechanical Engineering

Programme Code : ME Semester : Fifth

Course Title : AUTOMOBILE ENGINEERING

Course Code : 315372

#### I. RATIONALE

Diploma holders in Mechanical Engineering are expected to identify the components in automobile systems, select the different layouts as per the applications and demonstrate the working of various automobile systems. This course will be helpful to student in correlating various automobile systems with each other and provides the opportunity to work in various automobile manufacturing units, sales and service of automobiles products.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

Carry out activities / tasks related to vehicle maintenance efficiently by following safe practices.

# III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Use appropriate tools for vehicle service operation.
- CO2 Carryout repairing activities by following laid down procedures.
- CO3 Diagnose faults in given automobile control systems.
- CO4 Locate faults in suspension system of given automobile.
- CO5 Carryout appropriate test for given auto electrical and electronic components.

**Course Title** : SEMINAR AND PROJECT INITIATION COURSE

**Course Code** : 315003

#### I. RATIONALE

Most of the diploma graduates lack the confidence and fluency while presenting papers or interacting verbally and expressing themselves with a large gathering. Seminar presentation boosts the confidence of the students and prepares them precisely for facing the audience, interviews and group discussions. The course on seminar is to enhance student's ability in the art of academic writing and to present it. It also helps broaden the minds of the participants. Through this course on Seminar, students will develop new ideas and perspectives of the subject /themes of emerging technologies and services of their area of studies. Project initiation enhances project planning skill which establishes measurable objectives and interaction skills.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences: Present a seminar on the selected theme/area of study effectively and confidently to the specific audience and stakeholders. Plan innovative solutions independently or collaboratively to the identified problem statement.

#### III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Identify topics of seminar presenting to the large gathering at the institute/conference.
- CO2 Collect relevant and updated research-based data and information to prepare a paper of seminar presentation.
- CO3 Apply presentation skills.
- CO4 Create conducive environment for learning and discussion through seminar presentation.
- CO5 Identify a problem statement and establish the action plan for the successful completion of the project.

#### IV. TEACHING-LEARNING & ASSESSMENT SCHEME

#### V. General guidelines for SEMINAR and Project Initiation

- The seminar must be related to emerging trends in engineering / technology programme or may be inter/ multi-disciplinary, based on the industry expected outcomes of the programme.
- The individual students have different aptitudes and strengths. Therefore, SEMINAR should match the strengths of students. For this purpose, students shall be asked to select the TITLE (Theme)of SEMINAR they would like to prepare and present.

MSBTE Approval Dt. 24/02/2025

#### SEMINAR AND PROJECT INITIATION COURSE

- Seminar titles are to be finalized in consultation with the faculty mentor.
- Seminar must involve logic development of applications of various technologies/ processes applicable in industry.
- Seminar must be assigned to the single student. However, support of other students may be sorted while presenting the seminar
- Students are required to prepare using relevant software tools, write ups for presentation
- Students shall submit One Hard copy and one Soft copy each of the presentation and may be encouraged to keep a recorded copy of
  the presentation made during the seminar.
- Batch of 3-4 students shall be formed for project initiation.
- Projects give a platform for the students to showcase an attitude of inquiry to identify the problem statement related to the
  programme. Students shall Identify the information suggesting the cause of the problem and possible solutions
- Students shall study and assess the feasibility of different solutions and the financial implications.
- Students should collect relevant data from different sources (books/internet/market/suppliers/experts through surveys/interviews).
- Students shall prepare required drawings/ designs and detailed plan for the successful execution of the work.
- Students may visit the organisation pertaining to the problem statement as part of initial study.

## VI. Guidelines for Seminar preparation and presentation:

Once the title/topic of a seminar has been finalized and allotted to the student, the teacher's role is important as guide, mentor and motivator, to promote learning and sustain the interest of the students.

Following should be kept in mind while preparing and presenting the seminar:

- Seminar Orientation cum -briefing: the seminar topics/themes should be innovative, novel and relevant to the curriculum of the programme, and also aligned to the expectations of industry.
- Seminar Literature survey: Information search and data collection: the information and data should be authentic, realistic and relevant to the curriculum of the programme.
- Seminar Preparation, and presentation: The seminar shall be present with suitable software tools and supporting handout/notes. The presentation of seminar should not be more than 20 minutes including Q-A session.

The following guidelines may be followed for Project Initiation

- Establishing project scope: Determine the boundaries of the project.
- Defining project objectives: Set clear and measurable objectives that align with the project's purpose.
- Stakeholder identification and analysis: Perform an exercise in identifying all stakeholders involved in the project and analyzing their needs and expectations.
- Team Formation: Carefully build a team with the necessary skills and expertise to execute the project successfully.
- **Documentation.** Create a project planner showcasing the action plan, define the project's scope, outline the project definition, and design of the project. The document has to be made available to all stakeholders

#### VII. Criteria of Assessment /Evaluation of Seminar

#### A. Formative Assessment (FA) criteria

The assessment of the students in the fifth semester Progressive Assessment (PA) for 50 marks is to be done based on following criteria.

# A. Suggestive RUBRICS for assessment

Sr. No.	Criteria	Marks
1	Selection Topic/Theme of seminar	05
2	Literature review and data presentation	05
3	Quality of Preparation and innovativeness	05
4	Q-A handling	05
5	Time Management	05
6	Seminar Presentation report	10

#### Rubrics for assessment of Project Initiation

Sr. No.	Criteria	Marks
1	Selection of Theme of Problem Statement and its innovativeness	05

MSBTE Approval Dt. 24/02/2025

#### SEMINAR AND PROJECT INITIATION COURSE

2	Stages of development of Action plan	05
3	Prototyping	05

The total marks as per above out of 50, shall be converted in proportion of 25 marks.

#### B. Summative Assessment criteria/

The summative assessment of the students in the fifth semester End-Semester-Examination (ESE) for 50 marks is to be done based on following criteria. This assessment shall be done by the Faculty.

Suggestive **RUBRICS** may be developed by the faculty

Sr. No.	Criteria	Marks
1 .	Quality of information/Knowledge presented in SEMINAR	10
2	Creativity, Innovation in SEMINAR presentation	10
3	Response to the question during seminar presentation	10
4	Establishment of Innovative Problem Statement and its presentation	10
5	Objectives of the project and action plan	10

The total obtained marks shall be converted in proportion of 25 marks.

#### VIII. Suggestive CO-PO Mapping

Course Outcomes (COs)	Programme Outcomes (POs)											
	PO-1  Basic and Discipline  Specific Knowledge	PO-2	Decign/	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2			
CO-1	3	1	0	· · · · . <del>-</del> . · · ·	2	2	3					
CO-2	2		2	-	2	1	3					
CO-3	3	1	1	2	1	2	3					
CO-4	2	0	0	2	1	2	3		7			
CO-5	3	3	3	2	2	3	3					

# VIII. Typographical instructions/guidelines for seminar preparation & presentation

- The seminar PPT shall be computer typed (English- British)
- o Text Font -Times New Roman (TNR), Size-12 point
- Subsection heading TNR- 12 point bold normal
- Section heading TNR- 12 capital bold
  - o Chapter Name / Topic Name TNR- 14 Capital
  - All text should be justified. (Settings in the Paragraph)
  - o Different colors text/diagrams /tables may used
  - The name of the candidate, diploma (department), year of submission, name of the institute shall be printed on the first slide of PPT.

#### IX.Seminar and Project Initiation Report

On completion and presentation of Seminar, every student will submit a brief report which should contain the following:

- Cover Page (as per annexure 1)
- Title page (as per annexure 2)

MSBTE Approval Dt. 24/02/2025

Semester - 5, K Scheme

9/29/2025, 12:41 PM

#### SEMINAR AND PROJECT INITIATION COURSE

- o Certificate by the Guide (as per annexure 3)
- Acknowledgment (The candidate may thank all those who helped in the execution of the project).
- Abstract of Paper presented in the seminar (It should be in one page and include the purpose of the seminar & methodology if any .)
- Index
- List of Figures
- o Introduction
- o Literature Review
- o Information/Chapters related to Seminar topic
- Advantages and Disadvantages
- Conclusion
- Project Initiation: a) Description of problem statement. b) Scope and objectives. c) State holder d) Platform/ Equipment/ Resources identification.
- o Bibliography
- o References

NOTE: Seminar report must contain only relevant – technology or platform or OS or tools used and shall not exceed 25-30 pages.

Details of Softcopy to be submitted:

The soft copy of seminar presentation is required to be provided on the back cover of the seminar report in clear packet, which should include the following folders and contents:

- 1. Presentation (should include a PPT about project in not more than 15 slides)
- 2.Documentation (should include a word file of the project report)

NOTE: Soft copy must be checked for any harmful viruses before submission.

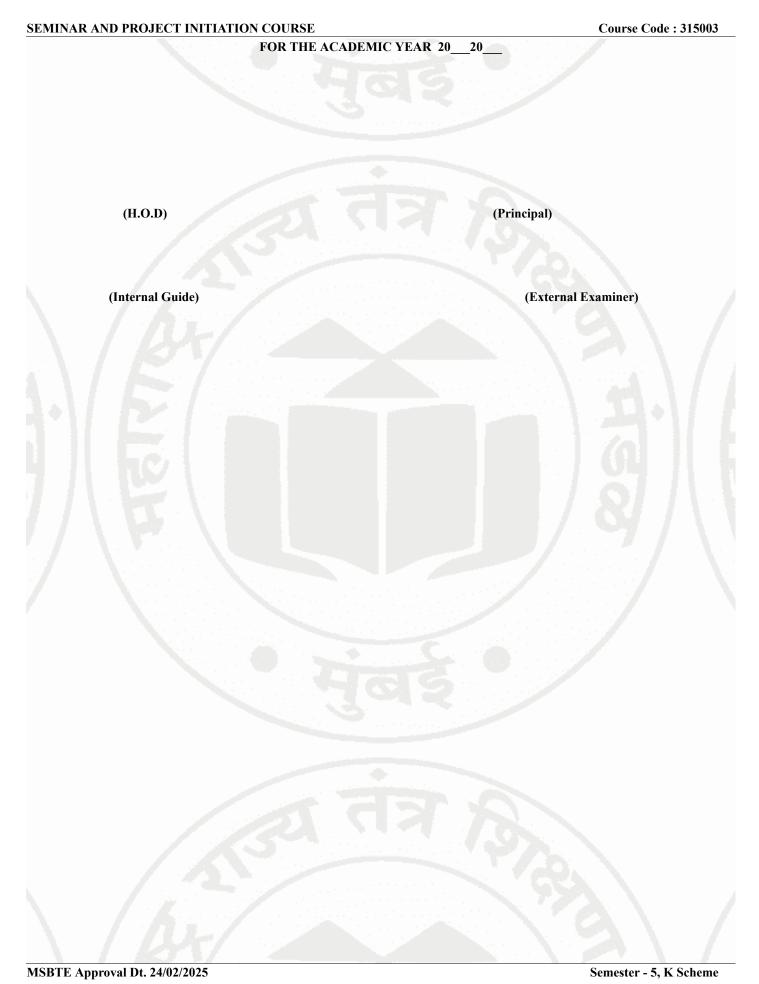

# X. Sample Formats

- 1) Cover Page Annexure-I
- 2) Index Annexure-II
- 3) Assessment Annexure-III

Semester : Fifth

Course Title : INTERNSHIP(12 WEEKS)

Course Code : 315004

#### I. RATIONALE

Globalization has prompted organizations to encourage skilled and innovative workforce. Internships are educational and career development opportunities, providing practical/ hands-on experience in a field or discipline. Summer internship is an opportunity for students to get accustomed to modern industry practices, apply the knowledge and skills they've acquired in the classroom to real-world situations and become familiar with industry environments before they enter the professional world. Keeping this in mind, industrial training is incorporated to all diploma programmes as it enables the student to get equipped with practical skills, soft skills and life skills

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences: Apply skills and practices to industrial processes.

# III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Observe time/resource management and industrial safety aspects.
- CO2 Acquire professional experience of industry environment.
- CO3 Establish effective communication in working environment.
- CO4 Prepare report of assigned activities and accomplishments.

#### IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Legends: # External Assessment

Note: Credits for Industrial Training are in-line of guidelines of NCrF: The industrial training is of 12 weeks considering 36-40 hours per week engagement of students (as per Guidlines of GR of Maharashtra Govt.) under Self Learning with guidance of industry supervisor / Mentor

## V General guidelines for organizing Industrial training

The Industry/organization selected for Industrial training/ internships shall be Government/Public Limited/ Private limited / Startup / Centre of Excellence/Skill Centers/Skill Parks etc.

- 1. Duration of Training 12 weeks students engagement time
- 2. Period of Time slot Between 4th and 5th semester (12 weeks) i.e. commencement of internships will be immediately following the 4th semester exams.
- 3. Industry area Engineering Programme Allied industries of large, medium or small-scale, Organization/Govt./ Semi Govt Sectors.

## VI Role(s) of Department at the Institute:

Following activities are expected to be performed by the concerned department at the Polytechnics.

#### Table of activities to be completed for Internship

S.No	Activity	Suggested Schedule
	Activity	WEEKS
1	Collection of information about industry available and ready for extending training with its offered capacity of students (Sample Format 1)	1 <sup>st</sup> to 3 <sup>rd</sup> week of 4 <sup>th</sup> Semester
2	Allocations of Student and Mentor as per availability (Mentor: Student Ratio (1:15)	4 <sup>th</sup> to 6 <sup>th</sup> week of 4 <sup>th</sup> semester
3	Communication with Industry and obtaining its confirmation  Sample letter Format	6 <sup>th</sup> to 8 <sup>th</sup> week of 4 <sup>th</sup> semester
4	Securing consent letter from parents/guardians of students (Sample Format 2)	Before 10 <sup>th</sup> week of 4 <sup>th</sup> semester
5	Enrollment of Students for industrial training (Format 3)	Before 12 <sup>th</sup> week of 4 <sup>rd</sup> semester
6	Issue of letter to industry for training along with details of students and mentor (Format 4)	Before 14 <sup>th</sup> week of 4 <sup>th</sup> Semester
7	Organize Internship Orientation session for students	Before end of 4 <sup>th</sup> Semester

MSBTE Approval Dt. 24/02/2025

#### **INTERNSHIP(12 WEEKS)**

8	Progressive Assessment of industry training by Mentor	Each week during training period
9	Assessment of training by institutional mentor and Industry mentor	5 <sup>th</sup> Semester ESE

# Suggestions-

- 1. Department can take help of alumina or parents of students having contact in different industries for securing placement.
- 2. Students would normally be placed as per their choices, in case of more demand for a particular industry, students would be allocated considering their potentials. However preference for placement would be given to students who have arranged placement in company with the help of their parents or relatives.
- 3. Principal/HOD/Faculty should address students about industrial safety norms, rules and discipline to be maintained in the industry during training before relieving students for training.
- 4. The faculty members during the visit to industry or sometimes through online mode will check the progress of the student in the training, student attendance, discipline, and project report preparation each week.

#### VII Roles and Responsibilities of students:

- 1. Students may interact with the mentor to suggest choices for suitable industry, if any. If students have any contact in industry through their parents or relatives then the same may be utilized for securing placement for themselves and their peers.
- 2. Students have to fill the forms/formats duly signed by institutional authorities along with a training letter and submit it to a training officer/mentor in the industry on the first day of training.
- 3. Students must carry with him/her Identity card issued by the institute during the training period.
- 4. Students should follow industrial dressing protocols, if any. In absence of specific protocol students must wear college uniform compulsorily.
- 5. Students will have to get all necessary information from the training officer/mentor at industry regarding schedule of training, rules and regulation of the industry and safety norms to be followed. Students are expected to observe these rules, regulations and procedures.
- 6. Students must be fully aware that if they disobey any rule of industry or do not follow the discipline then non-disciplinary action will be taken .
- 7. Students must maintain a weekly diary (**Format 6**) by noting daily activities undertaken and get it duly signed from industry mentor or Industrial training in charge.
- 8. In case students face any major problems in industry such as an accident or any disciplinary issue then they should immediately report the same to the mentor at the institute.
- 9. Prepare a final report about the training for submitting to the department at the time of presentation and vivavoce and get it signed from a mentor as well as industry training in charge.

MSBTE Approval Dt. 24/02/2025

#### **INTERNSHIP(12 WEEKS)**

10. Students must submit the undertaking as provided in **Format 5**.

#### VIII Typographical guidelines for Industry Training report

Following is the suggestive format for preparing the training report. Actual report may differ slightly depending upon the nature of industry. The training report may contain the following

- 1. The training report shall be computer typed (English- British) and printed on A4 size paper.
- 2. Text Font -Times New Roman (TNR), Size-12 point
- 3. Subsection heading TNR- 12 point bold normal
- 4. Section heading TNR- 12 capital bold
- 5. Chapter Name/Topic Name TNR- 14 Capital
- 6. All text should be justified. (Settings in the Paragraph)
- 7. The report must be typed on one side only with double space with a margin 3.5 cm on the left, 2.5 cm on the top, and 1.25 cm on the right and at bottom.
- 8. The training report must be hardbound/ Spiralbound with a cover page in black color. The name of the candidate, diploma (department), year of submission, name of the institute shall be printed on the cover.
- 9. The training report, the title page should be given first then the Certificate followed by the acknowledgment and then contents with page numbers.

#### IX Suggestive format of industrial training report

Following format may be used for training report. Actual format may differ slightly depending upon the nature of Industry/ Organization.

- Title Page
- Certificate
- Abstract
- Acknowledgement
- Content Page

Chapter 1	Organization structure of Industry and general layout.				
Chapter 2	Introduction to Industry / Organization (history, type of products and services, turn over and				
Chapter 2	number of employees etc.)				
/ /	Types of Major Equipments/raw materials/ instruments/machines/ hardware/software used				
Chapter 3	in industry with their specifications, approximate cost, specific use and routine maintenance				
	done				
Chapter 4	Processes/ Manufacturing Manufacturing techniques and methodologies and material				
Chapter 4	handling procedures				
Chapter 5	Testing of Hardware/Software/ Raw materials/ Major material handling product (lifts,				
Chapter 3	cranes, slings, pulleys, jacks, conveyor belts etc.) and material handling procedures.				
Chapter 6	Safety procedures followed and safety gears used by industry.				
Chanton 7	Particulars of Practical Experiences in Industry/Organization if any in Production/Assembly/				
Chapter 7	Testing/Maintenance				
Chapter 8	Detailed report of the tasks undertaken (during the training).				

MSBTE Approval Dt. 24/02/2025

#### **INTERNSHIP(12 WEEKS)**

Chapter 9	Special/challenging experiences encountered during training if any (may include students liking & disliking of workplaces).
Chapter 10	Conclusion
Chapter 11	References / sources of information

#### X Suggested learning strategies during training at Industry

- Students should visit the website of the industry where they are undergoing training to collect information about products, processes, capacity, number of employees, turnover etc.
- They should also refer to the handbook of the major machines and operations, testing, quality control and testing manuals.
- Students may also visit websites related to other industries wherein similar products are being manufactured.

#### XI Tentative week wise schedule of Industry Training

Industrial training is a common course to all Diploma programmes, therefore the industry selection will depend upon the nature of the programme and its related industry. The training activity may vary according to nature and size of industry.

The following table details of activities to be completed during industrial training.

### XII CO-PO Mapping Table to be created by respective Department/faculty.

#### XIII. Formative Assessment of training: Suggested RUBRIC

(Note: Allot the marks in proportion of presentations and outcome observed. Marks excluding component of week 11 are to be filled by Institute mentor)

Week	Outcome Achievement - Task to be Poor		Outcome Achievement - Moderate	Outcome Achiever	Week- wise	
No	assessed		8	Good Marks	Excellent Marks	
	Introduction of Industry	Knowledge of Departments, processes, products and work culture of	Departments,	of Departments, processes, products and work culture of the company	Extensive Knowledge of	

MSBTE Approval Dt. 24/02/2025

#### PRODUCT DESIGN AND DEVELOPMENT

Course Code: 315367

Programme Name/s : Mechanical Engineering/ Mechatronics/ Production Engineering

**Programme Code** : ME/ MK/ PG

Semester : Fifth

: PRODUCT DESIGN AND DEVELOPMENT **Course Title** 

**Course Code** : 315367

#### I. RATIONALE

Design and development are two key elements necessary to create any product. From start to finish, each phase of the product's lifecycle needs careful coordination between these two disciplines for a successful outcome. Each organization should come with innovative ideas to bring up a new product, to maintain a top position in the market. Product design and development is a complete cycle to launch of new industrial products i.e from conceptualization to product realization.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

Use principles of product design and development for launching new products in the market.

#### III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Apply principles to develop new small industrial products according to customer's requirement for launching.
- CO2 Use aesthetics and ergonomics principles for developing new products
- CO3 Apply DFM principles for development of new product
- CO4 Apply principles of QFD for Quality of new product
- CO5 Use relevant rapid prototyping methods for development of new product along-with IPR process.

#### IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Legends: @ Internal Assessment, # External Assessment, \*# On Line Examination, @\$ Internal Online Examination

Note:

- 1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
- 2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.

MSBTE Approval Dt. 24/02/2025

Course Code: 315367

#### PRODUCT DESIGN AND DEVELOPMENT

- 3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
- 4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.\* 10 Weeks
- 5. 1 credit is equivalent to 30 Notional hrs.
- 6. \* Self learning hours shall not be reflected in the Time Table.
- 7. \* Self learning includes micro project / assignment / other activities.

#### V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's)aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Explain the criteria of customer's need identification for designing new product. TLO 1.2 Explain principles of product design TLO 1.3 Explain product development process. TLO 1.4 State concept of product development TLO 1.5 Explain Seven step method for testing of product concept with example TLO 1.6 Explain process of implementing customer need for designing new product	Unit - I Product Development  1.1 Characteristics of successful product development, Customer need identification 1.2 Definition of product design, principles of good product design, Design by evolution, design by innovation 1.3 Product development process, Phases of process development. flow chart of product development. Tyco product development process 1.4 Concept development- different phases of concept development process, five step concept generation method, Concept classification tree, Concept combination table 1.5 Concept selection- Concept screening, Concept scoring, Seven step method for testing of product concept 1.6 Identification of customer need, Data collection from customer, organize collected data, Establishing relative importance of customer need for designing product with example	Lecture using media Lecture using Chalk-Board
2	TLO 2.1 Define product architecture TLO 2.2 Classify Modularity TLO 2.3 List different design considerations for machine controls using ergonomics principle. TLO 2.4 Apply relevant aesthetics and ergonomics principles in given situation. TLO 2.5 List different aspects of aesthetics in product design	Unit - II Product Architecture 2.1 Definition of product architecture, Modular and Integral product architecture, its types, Component standardization, Steps for establishing the architecture with example like trailer, Spanners etc 2.2 Ergonomics- definition, necessity of ergonomics in product design. Design consideration for qualitative and quantitative display, Design considerations for controls like knob, levers, handwheel, toggle switch. 2.3 Aesthetics Principles- definition, necessity of aesthetics in product design, consideration of aesthetics in product design, Aspects of Aesthetics in Product Design - form, symmetry, color, continuity, proportion, contrast, impression, surface finish	Lecture using media Model Demonstration
3	TLO 3.1 State importance of Industrial design	Unit - III Industrial Design 3.1 Importance of industrial design, Industrial	Lecture Using Chalk-Board

**MSBTE Approval Dt. 24/02/2025** 

PROD	rse Code : 315367		
Sr.No	Theory Learning Outcomes (TLO's)aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
	TLO 3.2 Explain term Design For Manufacturability (DFM) TLO 3.3 State necessity of Product Life Cycle TLO 3.4 Explain the procedure to determine 'Product Life Cycle' for given product.	design process 3.2 Design for manufacturability (DFM), steps for DFM, design principles for manufacturability, Factors affect on DFM, Impact of DFM on cost, quality and Time 3.3 Product Life Cycle- definition, importance, stages of Product life cycle, examples for determining product life cycle of Motorcycle, electrical vehicle etc	Lecture ueing media
4	TLO 4.1 Explain term Value engineering TLO 4.2 State procedure of Problem identification related to value engineering. TLO 4.3 State importance of QFD TLO 4.4 Explain QFD with suitable example. TLO 4.5 Draw House of Quality relationship Matrix for given product.	Unit - IV Value Engineering 4.1 Concept, Steps in value engineering, creative thinking, problem identification and value engineering job plan (VEJP). 4.2 Quality Function deployment (QFD) processneed, importance with example, symbols of QFD, voice of customer (VOC), VOC analysis, Quality QFD relationship matrix, roof ranking, Body ranking, importance of QFD 4.3 House of Quality linking customer complaints to technical requirements	Lecture Using Chalk-Board Case Study
5	TLO 5.1 List different types of Rapid prototyping TLO 5.2 Explain working and constructions of 3-D printer. TLO 5.3 Differentiate FDM and SLA 3 - D printer TLO 5.4 Overview of Patents and IPR (Intellectual Property Right) - Importance of patent, patent rights, criteria for patent, process for filing patents. TLO 5.5 Elaborate the benefits of	Unit - V Rapid Prototyping and Patent Filing 5.1 Rapid Prototyping- concepts, principles of rapid prototyping, Types of Rapid Prototyping- Proof of concept prototype, Looks like prototype, Works like prototype 5.2 3-D printer types – Fused deposition Modeling (FDM), Stereolithography (SLA), Selective Laser sintering (SLS), construction and working Comparison between different types of 3-D printer 5.3 Planning for prototyping-steps for planning for prototyping, define purpose, establish level of approximation, experimental plan, schedule for	Lecture using Chalk-Board Video Demonstrations

# VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.

for filing patents.

#### PRODUCT DESIGN AND DEVELOPMENT

Practical / Tutorial / Laboratory	Sr	Laboratory Experiment / Practical Titles /	Number	Relevant
Learning Outcome (LLO)	No	<b>Tutorial Titles</b>	of hrs.	COs

#### Note: Out of above suggestive LLOs -

- '\*' Marked Practicals (LLOs) Are mandatory.
- Minimum 80% of above list of lab experiment are to be performed.
- Judicial mix of LLOs are to be performed to achieve desired outcomes.

# VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

#### Activity based on voice of customer

• Prepare a brief report based on voice of customer through survey

#### Note:

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicial mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

#### VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
1	3 D printer (FDM)- size- 200x200x250 mm, layer resolution 0.08 mmto 0.4 mm,print speed 40-120 mm/sec,Nozzle size 0.4mm,Filament- ABS/PLA/Composit	12,13
2	Computer systems and peripherials-2GB RAM,CPU1GHz,Disk Space-1.2 GB for 64 bit platform,OS ,minimum .single core ,Graphic card, sound card	All
3	Solid Modeling software such as Creo, Solid Edge, Solid works or equivalent	All

# IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R- Level	U- Level	A- Level	Total Marks

#### XII. SUGGESTED LEARNING MATERIALS / BOOKS

Sr.No	Author	Title	Publisher with ISBN Number
1	K.T.Ulrich	Product Design and Development	6th edition, McGrawhill Publication, 2023 ISBN 9780071086950
2	A.K.Chitale, R.C.Gupta	Product Design and Manufacturing	7th edition, PHI publication 2023, ISBN-13-978-9391818722
3	3 Richard Morris Fundamentals of Product Design		2nd edition,2023, Bloomsbury Visual Arts Publication, ISBN 13- 978-1350398856
4	M.M.Soreas	Ergonomics in Design	1st edition,2016 CRC Press Publication, ISBN13- 978-0367356903

# XIII. LEARNING WEBSITES & PORTALS

Sr.No	Link / Portal	Description
1	https://archive.nptel.ac.in/courses/112/107/112107217/	NPTEL lecture on product design steps and

MSBTE Approval Dt. 24/02/2025

<sup>\*</sup>PSOs are to be formulated at institute level

Course Code: 315367

# PRODUCT DESIGN AND DEVELOPMENT
